🔗 My Portfolio

Profile

Data Science graduate with hands-on experience in Python, SQL, and data ingestion pipelines. Focused on building reliable data workflows and automation systems.

Education

VNU University of Science (VNU-HUS)
Bachelor of Data Science

Aug 2021 – Apr 2026 | Ha Noi, Vietnam

Professional Experience

Smartlog

Jan 2025 – Jun 2025 | Ha Noi, Vietnam

AI Application Developer Intern

- Developed a multimodal RAG chatbot and integrated AI solutions into customer-facing applications.
- Built automated workflows and AI agents with n8n, including Gmail-based order management processes.
- Deployed text and image-to-image models locally with Ollama and implemented text embeddings for multimodal RAG.

Projects

JobLake - Multi-Source Job Data Ingestion Pipeline 🔗

Jun 2026 – Present

- Built a configurable Python pipeline integrating **9 Vietnamese job platforms**, with source-specific adapters and versioned parsers to normalize heterogeneous job listings.
- Orchestrated discovery, fetching, and parsing through **Apache Airflow and Docker**, using PostgreSQL-backed queues, source-level locks, retries, and restartable processing; enabled reprocessing from SHA-256-verified raw HTML in MinIO.
- Implemented listing lifecycle tracking with **scan-completeness safeguards** and transactional Supabase reconciliation, publishing active listings while retaining local processing history.
- Added **LLM enrichment with Gemini and Groq** to extract skills, experience, seniority, and work arrangements, with schema and source-evidence validation, persistent retries, quota-aware routing, and content-hash-based result reuse.
- Built **joblake-web with Next.js and TypeScript**, deployed on Vercel, providing PostgreSQL full-text search with prefix matching, source/location filters, job details, and aggregate statistics through a read-only serving layer.

Skills

Languages: Python, SQL

Data Engineering: ETL/ELT, data ingestion, data validation, web scraping

Databases & Storage: PostgreSQL, MongoDB, BigQuery, MinIO

Tools: Git, n8n, Docker, Apache Airflow

AI: RAG, embeddings, LLM applications

Certificates

SQL 🔗

- HackerRank SQL Intermediate Certificate

English

- TOEIC: 920/990
